The Conservation Technology Information Center (CTIC) is a national, nonprofit 501(c)(3) organization. CTIC champions, promotes and provides information about comprehensive conservation and sustainable agricultural systems that are beneficial for soil, water, air and wildlife resources and are productive and profitable for agriculture.

This publication was made possible through funding provided by the United Soybean Board (USB) Sustainability Initiative. USB is made up of 68 farmer-directors who oversee the investments of the soybean checkoff on behalf of all U.S. soybean farmers. Checkoff funds are invested in the areas of animal utilization, human utilization, industrial utilization, industry relations, market access and supply. As stipulated in the Soybean Promotion, Research and Consumer Information Act, USDA's Agricultural Marketing Service has oversight responsibilities for USB and the soybean checkoff. The opinions expressed are those of the authors based on a comprehensive review of the published literature.
